

Nina Aguas interview on ABS-CBN News Channel, 07 June 2019

Insular Life Assurance Company, Ltd. (InLife) remains resilient despite tremors from last year's macroeconomic performance. Our Executive Chairman Nina D. Aguas, in her ABS-CBN News Channel interview last June 07, discussed the Company's efforts to sustain financial inflows.

Apart from the core insurance business primarily driven by the Bancassurance and agency force, Aguas highlighted InLife's investment to International Finance Corporation (IFC) Green Bonds as alternative revenue source which captures attractive yields of 6% - 7% over time. She noted that InLife partnered with IFC to bridge the knowledge gap on risk protection in the women sector with an estimated a potential lead generation of Php 200 Billion business by 2020.

Aguas also discussed InLife's non-financial highlights, including the strong digitalization efforts in line with the goal to become the most digitally connected life insurance company in the country, and the high corporate governance culture permeating the entire company which earned Three Arrow Award in the ASEAN Corporate Governance Scorecard.
